Proper Citation: Bill and Melinda Gates Foundation (RRID:SCR_006346)

Description: Foundation to help all people lead healthy, productive lives, this funding and job resource is focused on health, poverty, and opportunity. They work with partner organizations worldwide to tackle critical problems in four program areas. Their Global Development Division works to help the world's poorest people lift themselves out of hunger and poverty. Their Global Health Division aims to harness advances in science and technology to save lives in developing countries. Their United States Division works to improve U.S. high school and postsecondary education and support vulnerable children and families in Washington State. And their Global Policy & Advocacy Division seeks to build strategic relationships and promote policies that will help advance their work. Our approach to grantmaking in all four areas emphasizes collaboration, innovation, risk-taking, and, most importantly, results. The foundation is unable to make grants directly to individuals. The majority of our funding is proactive and made to U.S. tax-exempt organizations that are independently identified by our staff.

Abbreviations: Gates Foundation

Synonyms: Bill & Melinda Gates Foundation

Resource Type: institution

Keywords: development, health, education, grant, science, technology, career, global health, global development, agricultural development, emergency response, family planning, maternal health, neonatal health, child health, nutrition, polio, vaccine, sanitation, hygiene

Related Condition: Enteric disease, Diarrheal disease, HIV, Malaria, Neglected infectious disease, Infectious disease, Pneumonia, Tuberculosis
