Type: Tool

Proper Citation

Google App Engine (RRID:SCR_006496)

Resource Information

URL: <https://developers.google.com/appengine/>

Proper Citation: Google App Engine (RRID:SCR_006496)

Description: Platform as a service that provides a fully-integrated application environment that permits web applications to run on Google's infrastructure. The environment includes: dynamic web serving, with full support for common web technologies, persistent storage with queries, sorting and transactions, automatic scaling and load balancing, APIs for authenticating users and sending email using Google Accounts, and a fully featured local development environment. Project Hosting on Google Code is a free service to the open source community. Easy to build, Easy to scale, Easy to maintain * Zero to sixty: Scale your app automatically without worrying about managing machines. * Supercharged APIs: Supercharge your app with services such as Task Queue, XMPP, and Cloud SQL, all powered by the same infrastructure that powers the Google services you use every day. * You're in control: Manage your application with a simple, web-based dashboard allowing you to customize your app's performance.
