Proper Citation: Musculoskeletal Transplant Foundation - MTF (RRID:SCR_006684)

Description: The Musculoskeletal Transplant Foundation is a non-profit service organization dedicated to providing quality allograft tissue through a commitment to excellence in education, research, recovery and care for recipients, donors and their families. We are a national consortium comprised of academic medical institutions, organ procurement organizations and tissue recovery organizations. MTF was created as a charitable organization with a mission that is dedicated to the needs of donors, donor families, patients and surgeons. We focus on respectful stewardship of the donated gift while advancing the science and practice of bone, ligament, cartilage and skin transplantation. Since our inception in 1987, MTF has recovered more than 60,000 donors and distributed more than 3 million grafts for transplantation. We also support research to expand the science of transplantation, and we encourage the efforts of our members and non-member clients to improve the understanding of donation and transplantation among the medical community and the public at large. Our policies are developed and implemented by MTF's Medical Board of Trustees, Donation Board of Trustees and Board of Directors, composed of physicians and recovery agency representatives who are dedicated to the mission of the Foundation. This fundamental commitment enables us to set and maintain the highest levels of safety assurance and quality control in all phases of our operations.
