Proper Citation: BrainMaps.org (RRID:SCR_006878)

Description: An interactive multiresolution brain atlas that is based on over 20 million megapixels of sub-micron resolution, annotated, scanned images of serial sections of both primate and non-primate brains and integrated with a high-speed database for querying and retrieving data about brain structure and function. Currently featured are complete brain atlas datasets for various species, including *Macaca mulatta*, *Chlorocebus aethiops*, *Felis catus*, *Mus musculus*, *Rattus norvegicus*, *Tyto alba* and many other vertebrates. BrainMaps is currently accepting histochemical, immunocytochemical, and tracer connectivity data, preferably whole-brain. In addition, they are interested in EM, MRI, and DTI data.

Abbreviations: BrainMaps

Synonyms: BrainMaps: An Interactive Multiresolution Brain Atlas, BrainMaps.org: High Resolution Brain Atlases, BrainMaps

Resource Type: data repository, data or information resource, service resource, atlas, storage service resource, image repository

Defining Citation: [PMID:17229579](#)

Keywords: aves, brain connection, *callicebus moloch*, *c. auratus*, connectivity, *monodelphis*, *o. anatinus*, *tachyglossidae*, brain mapping, virtual microscopy, brain atlas, non-primate, nissl stain, nissl, parvalbumin, smi-32, acetylcholinesterase, luxol fast blue, calbindin, myelin, neuroanatomy, image, brain structure, brain function, database, serial section, brain, tract tracing, coronal, horizontal, sagittal, web service, gene, FASEB list
