Proper Citation: Neural Connections (RRID:SCR_006986)

Description: Blog is first and foremost dedicated to circuitry, all the way from a small cluster of connections in a small brain area to wide-spread circuitry between several brain areas (local, regional and functional connectivity). My Philosophy (on neuroscience): I do not think that functions of the brain (and/or mind) can be localized to certain areas (modular zones). This is a distributed, interactive function in a neural network. Second, there is usually an underlying tone that relates to the hippocampus, and/or the post has a systems-level approach to it. Postings will most likely be in a review-esque fashion. This is really meant to be an information resource. I hope to get more opinion pieces in there sometime. Posts are usually what I am currently researching, interested in, or what I have previously done research on at one time. I also want to build a community of professionals and others interested in neuroscience and/or psychology (philosophy of mind, too!). The blog, in general, helps everything (the information) stay fresh in my mind.

Abbreviations: NC

Synonyms: Neural Connections - How circuitry can unravel the mind

Resource Type: data or information resource, narrative resource, blog

Keywords: circuitry, cognition, connectivity, depressive disorder, emotion, face, hippocampus, memory, neuro outreach, perception, philosophy, psychology, sfm, stress, anxiety, neuroscience

Resource Name: Neural Connections

Resource ID: SCR_006986

Alternate IDs: nlx_144591

Record Creation Time: 20220129T080239+0000

Record Last Update: 20260813T054933+0000

Ratings and Alerts

No rating or validation information has been found for Neural Connections.

No alerts have been found for Neural Connections.
