Description: SUPERFAMILY is a database of structural and functional protein annotations for all completely sequenced organisms. The SUPERFAMILY annotation is based on a collection of hidden Markov models, which represent structural protein domains at the SCOP superfamily level. A superfamily groups together domains which have an evolutionary relationship. The annotation is produced by scanning protein sequences from over 1,700 completely sequenced genomes against the hidden Markov models.

Synonyms: Superfamily - HMM library and genome assignments server

Resource Type: data or information resource, database

Defining Citation: [PMID:11697912](#)

Keywords: protein, hmm, hidden markov model, genome, structure, homology, model, FASEB list
