Proper Citation: University of California Los Angeles Department of Neurobiology (RRID:SCR_007982)

Description: The Department of Neurobiology's doctoral program provides a strong theoretical and practical foundation in the area of cellular and systems neurobiology with the goal of developing a better understanding of nervous system function and behavior. The graduate program has three major aims to provide basic and advanced instruction in the fundamentals of neurobiology, advanced independent research training in the areas of cellular, structural and systems neurobiology, and teaching experience in undergraduate and professional (dental and medical) courses in neuroscience. The educational program consists of a core series of courses that provide fundamental training in neurobiology. Course subject matter is focused on molecular, cellular, structural, systems and regulatory neurobiology. Advanced topic seminar courses provide training in synaptic and neuronal communication, neuronal plasticity, neuroanatomy, learning and memory, neuroendocrinology, developmental neurobiology, sensory and motor systems, and integrative neurobiology. The educational program is also distinguished by the availability of seminars and journal clubs that provide students with the opportunity for discussion and presentation of contemporary neuroscience literature.
