Proper Citation: Psychology Post-doctoral Training Program, US Department of Veterans affairs, Salt Lake City, UT (RRID:SCR_008076)

Description: This web site is an overview of the post-doctoral psychology training program at the VA Salt Lake City Health Care System (VA SLC HCS). Its purpose is to help prospective psychology post-docs learn about the training and professional growth opportunities that are available. The VA Salt Lake City Health Care System postdoctoral fellowship is a full-time, 12-month continuous appointment focused on specialty training in the evaluation and treatment of veterans with Post-Traumatic Stress Disorder.

Postdoctoral Fellows will be active members of two interdisciplinary treatment teams: - The PTSD Clinical Team through the Mental Health Department - The Polytrauma Team through the Physical Medicine and Rehabilitation Department. Fellows will also provide community outreach to returning veterans from Afghanistan and Iraq. Especially relevant to the VA Mental Health Strategic Plan, psychological services are provided within the complementary areas of emotional trauma (e.g., military combat, military sexual trauma), physical trauma (e.g., TBI, orthopedic injuries), substance abuse, and couples/family discord, primarily within the OEF/OIF veteran population. Sponsors: This work is funded by the US Department of Veterans Affairs, Salt Lake City.
