**Description:** Research institute that focuses on basic biomedical science, drug discovery and technology development. The Scripps Florida research team focuses on the development of therapeutics in areas including neurology, cancer, the immune system, cardiovascular disease, metabolic disease, and infectious diseases. This institute has six departments: Cancer Biology, Molecular Therapeutics, Immunology and Microbial Science, Metabolism and Aging, Chemistry, and Molecular and Integrative Neurosciences. There is also the Translational Research Institute (TRI) which includes the following components: Discovery Biology, Drug Metabolism and Pharmacokinetics (DMPK), TRI-Informatics, Lead Identification and HTS, and Medicinal Chemistry. These groups collaborate in the discovery and development of new therapeutic agents. The Scripps Florida institute also offers a graduate program that emphasizes chemistry, chemical biology, biophysics and the biological sciences. This resource also provides a variety of programs for middle school, high school and college-age students to participate in research activities. These programs have a special emphasis on recruiting from historically underrepresented groups in the sciences.
