Proper Citation: World Medical Association (RRID:SCR_008592)

Description: An organization that promotes the highest possible standards of medical ethics. The WMA provides ethical guidance to physicians through its Declarations, Resolutions and Statements. These also help to guide National Medical Associations, governments and international organizations throughout the world. The Declarations, Resolutions and Statements cover a wide range of subjects, including an International Code of Medical Ethics, the rights of patients, research on human subjects, care of the sick and wounded in times of armed conflict, torture of prisoners, the use and abuse of drugs, family planning and pollution.

Synonyms: WMA

Resource Type: data or information resource, portal, topical portal

Keywords: code of medical ethics, ethical guidance

Availability: Public, Available to the medical community

Resource Name: World Medical Association

Resource ID: SCR_008592

Alternate IDs: nif-0000-31912

Record Creation Time: 20220129T080248+0000

Record Last Update: 20260815T182347+0000

Ratings and Alerts

No rating or validation information has been found for World Medical Association.
