Proper Citation: Clinical Outcomes Research Initiative (RRID:SCR_009010)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on December 5, 2022. Endoscopic Reporting Software, aggregated and individual research data and tailor-made services aimed to advance the overall practice of endoscopy. It was developed to study outcomes of gastrointestinal (GI) endoscopic procedures in real life settings, using data obtained from the CORI Endoscopic Reporting Software or from other endoscopic reporting software. Practice sites include hospitals, ambulatory care centers, private practices, universities, and Veteran's hospitals (VA's). The CORI v4 Endoscopic Reporting Software is a specialty Electronic Health Record used to document endoscopic procedures and provide reporting services to your practice. Data from participating providers is also sent to a central data repository to become part of the National Endoscopic Database (NED), which now contains data from over 2.7 million GI procedures. The CORI v4 Endoscopic Reporting Software offers significant benefits for participating practices, providers and patients, as well as for everyone who benefits from CORI's research efforts. You may actively participate in research with CORI. If you have ideas for research using the NED, their research team can help you evaluate those ideas, collect and analyze the data. In addition, you may choose to participate in one of the prospective research projects conducted by CORI research staff.

Abbreviations: CORI

Resource Type: data or information resource, database, resource, service resource, software resource

Keywords: clinical, endoscopy, gastroenterology, gastrointestinal, endoscopic, endoscopy reporting software, outcome, report, electronic health record, aggregator

Funding: NIDDK

Availability: THIS RESOURCE IS NO LONGER IN SERVICE

Resource Name: Clinical Outcomes Research Initiative

Resource ID: SCR_009010

Alternate IDs: nlx_152692

Record Creation Time: 20220129T080250+0000

Record Last Update: 20260804T043418+0000
