Proper Citation: SMOOTH (RRID:SCR_009398)

Description: Software tool that recognises and removes the most unrealistic data points for the construction of accurate linkage maps, which is not so much depending on the quality of the mapping software, but mostly on the marker data quality. Missing values and scoring errors can severely influence the calculated marker order. This software was used to construct the 10,000 marker potato map. The removal of improbable data point is a good medicine for linkage maps, that is not easily overdosed. One error is more harmful than ten missing values. The software was never intended as user-friendly software. In these days it would be more useful to re-do the programming of the pascal source code into a perl script. Anyone who takes the initiative to generate such a script is welcomed to contact the authors. SMOOTH works best in close cooperation with mapping algorithm RECORD (entry from Genetic Analysis Software)

Resource Type: software application, software resource

Keywords: gene, genetic, genomic, pascal, ms-dos

Resource Name: SMOOTH

Resource ID: SCR_009398

Alternate IDs: nlx_154636

Old URLs: http://www.plantbreeding.wur.nl/UK/software_smooth.html

Record Creation Time: 20220129T080252+0000

Record Last Update: 20260805T044222+0000

Ratings and Alerts

No rating or validation information has been found for SMOOTH.

No alerts have been found for SMOOTH.
