Description: Drexel University was founded in 1891 as the Drexel Institute of Art, Science and Industry by Philadelphia financier and philanthropist Anthony J. Drexel to provide educational opportunities in the "practical arts and sciences" for women and men of all backgrounds. Undergraduate majors/minors, certificate programs, graduate & professional, and Interdisciplinary programs are offered. Drexel's array of programs, concentrations, courses and curricula are designed to prepare students for critical issues in science, technology, health sciences, information science, media arts, the humanities, and business to shape the next generation workforce and professoriate, and provide them the basic skills to be effective practitioners, communicators, and leaders. Drexel's programs are complemented by co-operative education experiences for many of our students, where theory and practice converge. Drexel has more than 87 majors and over 100 minors to choose from so that your academic experience can be exactly what you want. With nationally recognized programs and countless choices, selecting a major can be daunting.
