Description: A government-funded research organization with the following missions: * To evaluate and carry out all research capable of advancing knowledge and bringing social, cultural, and economic benefits for society. * To contribute to the application and promotion of research results. * To develop scientific information. * To support research training. * To participate in the analysis of the national and international scientific climate and its potential for evolution in order to develop a national policy. As the largest fundamental research organization in Europe, CNRS carried out research in all fields of knowledge, through its seven institutes: * Institute of Biological Sciences (INSB) * Institute of Chemistry (INC) * Institute of Ecology and Environment (INEE) * Institute for Humanities and Social Sciences (INSHS) * Institute for Computer Sciences (INS2I) * Institute for Engineering and Systems Sciences (INSIS) * Institute of Physics (INP) and three national institutes: * National Institute for Mathematical Sciences (INSMI) * National Institute of Nuclear and Particle Physics (IN2P3) * National Institute for Earth Sciences and Astronomy (INSU) CNRS''s annual budget represents a quarter of French public spending on civilian research. This funding comes from various sources: * Government and public funding; * CNRS funds, primarily from industrial and EU research contracts and royalties on patents, licenses, and services provided.
