Proper Citation: National Institute of Arthritis and Musculoskeletal and Skin Diseases (RRID:SCR_012715)

Description: Established in 1986, the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) was established in 1986. The mission of the NIAMS is to support research into the causes, treatment, and prevention of arthritis and musculoskeletal and skin diseases; the training of basic and clinical scientists to carry out this research; and the dissemination of information on research progress in these diseases. The Institute also conducts and supports basic research on the normal structure and function of bones, joints, muscles, and skin. Basic research involves a wide variety of scientific disciplines, including immunology, genetics, molecular biology, structural biology, biochemistry, physiology, virology, and pharmacology. Clinical research includes rheumatology, orthopaedics, dermatology, metabolic bone diseases, heritable disorders of bone and cartilage, inherited and inflammatory muscle diseases, and sports and rehabilitation medicine.

Abbreviations: NIAMS

Synonyms: National Institute of Arthritis and Musculoskeletal and Skin Diseases

Resource Type: institution

Resource Name: National Institute of Arthritis and Musculoskeletal and Skin Diseases

Resource ID: SCR_012715
