Proper Citation: Forward: Accurate finite element electromagnetic head models (RRID:SCR_014109)

Description: A project which aims to simplify the preparation of accurate electromagnetic head models for EEG forward modeling. It builds off of the seminal SimNIBS tool for electromagnetic field modelling of transcranial magnetic stimulation and transcranial direct current stimulation. Human skin, skull, cerebrospinal fluid, and brain meshing pipelines have been rewritten with Nipype to ease access parallel processing and to allow users to start/stop the workflows. Conductivity tensor mapping from diffusion-weighted imaging is also included.

Synonyms: Forward

Resource Type: simulation software, software application, software resource

Keywords: model, simulation software, electromagnetic head model, eeg forward modeling, mapping

Funding: Belgian National Fund for Scientific Research ;
Marie Curie Initial Training Network in Neurophysics PITN-GA-2009-238593

Resource Name: Forward: Accurate finite element electromagnetic head models

Resource ID: SCR_014109

License: GNU GPL v2

Record Creation Time: 20220129T080319+0000

Record Last Update: 20260805T044320+0000

Ratings and Alerts

No rating or validation information has been found for Forward: Accurate finite element electromagnetic head models.

No alerts have been found for Forward: Accurate finite element electromagnetic head models.
