Proper Citation: Intrinsic Unscented Kalman Filter (IUKF) Tractography Software v1.0
(RRID:SCR_014127)

Description: A tractography algorithm for HARDI which provides a relatively accurate and efficient fiber tracking mechanism by reconstructing a bi-tensor model for underlying signals and exploiting intrinsic operations on the space of diffusion tensors. Given HARDI data sets, IUKF is capable of tracking in the presence of complex local geometries, such as crossing and kissing fibers. Reconstruction is only performed at the voxels along estimated fibers.

Synonyms: IUKF Tractography Software v1.0, IUKF Tractography Software, Intrinsic Unscented Kalman Filter Tractography Software, Intrinsic Unscented Kalman Filter Tractography Software v1.0

Resource Type: software application, data processing software, 3d visualization software, software resource, data visualization software

Keywords: filter, data visualization software, 3d visualization, tractography, algorithm, fiber tracking, HARDI

Funding: NINDS NS066340

Availability: Available for download

Resource Name: Intrinsic Unscented Kalman Filter (IUKF) Tractography Software v1.0
