Proper Citation: Northwestern University Materials Characterization and Imaging Core Facility (RRID:SCR_017947)

Description: Core offers characterization and sample preparation equipment. Characterization techniques include optical microscopy, thermal imaging, thermal analysis (DSC, TGA), hardness testing (Vicker, Knoop, Rockwell), electronic characterization (Hall Effect, Impedance Spectroscopy, Kelvin Probe, Charge Transport) and rheological characterization. Sample and surface preparation capabilities include mounting (castable mounts, hot pressure mounting, vacuum impregnation), cutting, sectioning and wafer dicing, polishing/grinding, electropolishing, ion beam milling and cross-sectional polishing. Tube and box furnaces are available with temperature range up to 1700C for thermal processing.

Abbreviations: MatCI

Synonyms: Materials Characterization and Imaging Facility

Resource Type: access service resource, core facility, service resource

Keywords: Equipment, characterization, sample, preparation, optical, microscopy, thermal, imaging, analysis, hardness, testing, electronic, characterization, rheological, surface, mounting, cutting, sectioning, wafer, dicing, electropholishing, ion, beam, milling, thermal, processing, service, core, ABRF

Funding: DMR 1720139

Availability: Open

Resource Name: Northwestern University Materials Characterization and Imaging Core Facility

Resource ID: SCR_017947

Alternate IDs: ABRF_937

Record Creation Time: 20220129T080337+0000

Record Last Update: 20260905T133416+0000

Ratings and Alerts

No rating or validation information has been found for Northwestern University Materials Characterization and Imaging Core Facility.

No alerts have been found for Northwestern University Materials Characterization and Imaging Core Facility.
