Proper Citation: Tosoh: G8 Hematology Analyzer (RRID:SCR_020860)

Description: G8 HPLC Hematology Analyzer is the Tosoh's industry HPLC testing systems for fast and accurate HbA1c results. Tosoh designed the G8 HPLC Analyzer from the user's perspective, enhancing overall safety and of operation. The system utilizes Ion-exchange HPLC testing method, which is the gold standard for HbA1c diabetes measurement. The system is used for in vitro diagnostic measurement of HbA1c in blood specimens. The G8 uses a non-porous column and microcomputer technology to quickly and accurately measure the stable portion of HbA1c as a percentage of the total amount of hemoglobin present in the sample. The G8 provides accurate and precise separation of HbA1c from other hemoglobin fractions. Off-line pretreatment is not required, and there is no interference from the labile portion of HbA1c.

Resource Type: instrument resource

Keywords: Tosoh, Hematology Analyzer, Instrument Equipment, USEDit

Availability: Commercially available

Resource Name: Tosoh: G8 Hematology Analyzer

Resource ID: SCR_020860
