Proper Citation: Dartmouth Geisel School of Medicine Mouse Modeling Core Facility (RRID:SCR_021284)

Description: Supports generation and utilization of genetically modified mice, design and production of genetic constructs with methods including yeast and E.coli recombineering, ES cell targeting (transfection, drug selection, and expansion). Produces transgenic mice: DNA injections into oocytes, ES cell injections into blastocysts. Provides humanized immune system mouse models. Offers start to finish experiment services to assist your many needs, please ask for more info. Other services include animal husbandry, IP and IV injections, blood drawing, necropsy and surgeries- embryo transfers, ovariectomy, vasectomy, tumor removal.
