Proper Citation: Smart-seq2 Single Nucleus Multi Sample Pipeline (RRID:SCR_021312)

Description: Software pipeline for single-nucleus RNAseq data generated by Smart-seq2 assays. Used to simultaneously process multiple libraries of single nuclei Smart-seq2 and Smart-seq4 data. For each library (nucleus), the pipeline trims paired FASTQ files, aligns trimmed reads to the genome, counts intronic and exonic reads, and calculates quality control metrics. Counts and metrics for all libraries are combined into merged Loom formatted count matrix.

Synonyms: Multi-snSS2, Smart-seq2 Single Nucleus Multi-Sample Pipeline

Resource Type: software toolkit, data processing software, software resource, software application

Keywords: snRNAseq data, Smart-seq2 assays, single nucleus, multi sample, WARP repository
