Proper Citation: Robotic Flower System for Bee Behavior project (RRID:SCR_021584)

Description: Portal provides system of robotic artificial flowers to study bumble bee behavior. System is designed to capture data when animal is feeding by placement of IR beams that are broken when engaged on flowers feeding mechanism and sends data to control unit. Developed by University of Oulu in Finland scientists. System includes control unit, separate artificial flowers, and personal computer. Control unit is to handle electronics of flowers, collect data from them, and to send data to computer. Flowers contain infrared sensor, their associated electronics, and electromechanical device that offers small, precise amount of sugar solution from reservoir. Computer runs software that controls refilling rate and data collection via the control unit. Circuit diagrams, parts list, and control software and source code are available in paper supplemental information.

Synonyms: Robotic Flower System for Bee Behavior

Resource Type: instrument resource, portal, data or information resource, project portal

Defining Citation: [DOI:10.1002/ece3.2062](https://doi.org/10.1002/ece3.2062)

Keywords: Robotic artificial flowers, study bumble bee behavior, animal feeding data, flowers feeding mechanism, OpenBehavior, Instrument

Availability: Free, Freely available

Resource Name: Robotic Flower System for Bee Behavior project

Resource ID: SCR_021584

Record Creation Time: 20220129T080356+0000

Record Last Update: 20260805T044452+0000

Ratings and Alerts

No rating or validation information has been found for Robotic Flower System for Bee Behavior project.

No alerts have been found for Robotic Flower System for Bee Behavior project.
