Proper Citation: ATLAS.ti (RRID:SCR_022920)

Description: Software qualitative analysis tool. Used by researchers and practitioners to uncover and systematically analyze complex phenomena hidden in unstructured data including text, multimedia, geospatial. Provides tools that let the user locate, code, and annotate findings in primary data material, to weigh and evaluate their importance, and to visualize relations between them. Consolidates documents and keeps track of all notes, annotations, codes and memos in all fields that require close study and analysis of primary material consisting of text, images, audio, video, and geo data. Provides analytical and visualization tools designed to open new interpretative views on material.

Synonyms: ATLAS.ti version no. 5. 2

Resource Type: software application, software resource, data analytics software

Keywords: ATLAS.ti Scientific Software Development GmbH, unstructured data analysis, text, images, audio, video, geo data, analytical and visualization tools, locate, code, and annotate findings in primary data material

Availability: Restricted

Resource Name: ATLAS.ti

Resource ID: SCR_022920

Record Creation Time: 20221025T050158+0000

Record Last Update: 20260812T044430+0000
