Proper Citation: Stoelting: Motorized Mouse Stereotaxic Instrument (RRID:SCR_025303)

Description: Compact stereotaxic instrument designed for use with knock-out and transgenic mice. Instrument includes 100 micron, 3-axes left-hand manipulator arm, mouse snout clamp and tooth bar, dual-sided ear bars, and corner clamp probe holder. Stoelting's Motorized Stereotaxic Manipulator Arms are designed for fast, accurate positioning during stereotaxic surgery. Motorized manipulator arms employ touchscreen display for easy-to-control movement of each axis. Manual movement is available anytime. Optional Drill feature available.

Resource Type: instrument resource

Keywords: Compact stereotaxic instrument, stereotaxic surgery,

Availability: Restricted
