Description: Software tool as protein-protein/nucleic acid interaction site prediction model built by enhanced graph neural networks and prioritized radial basis function neural networks. Protein-protein and protein-nucleic acid binding site prediction via interpretable hierarchical geometric deep learning.

Resource Type: software application, simulation software, source code, software resource

Keywords: protein, nucleic acids, interactions, python, binding site prediction,

Availability: Free, Available for download, Freely available

Resource Name: GraphRBF
