Proper Citation: Taiwan Birth Reporting System Database (RRID:SCR_026047)

Description: Provides comprehensive national registry that systematically records all live births in Taiwan. It captures essential data on maternal and infant health, including maternal demographics, prenatal care, gestational age, birth weight, delivery method, and congenital anomalies. Established to facilitate public health monitoring and research, the TBRS enables studies on birth trends and outcomes, such as preterm birth and low birth weight, and provides a valuable resource for investigating the impacts of maternal health, environmental factors, and healthcare access on neonatal outcomes. TBRS database is instrumental in informing maternal and child health policies in Taiwan.

Synonyms: TBRS database

Resource Type: data or information resource, database

Keywords: national registry, systematical recordings, live births, Taiwan

Availability: Free, Freely available

Resource Name: Taiwan Birth Reporting System Database
