Proper Citation: Olympus: BX43 clinical microscope (RRID:SCR_027598)

Description: Olympus BX43 is a popular clinical and research grade microscope that can be configured for many different applications. Modular components enable you to customize the microscope for brightfield, polarization, phase contrast, and fluorescence. BX43 microscope utilizes a high color rendering white LED with a luminosity equivalent to a 30 W halogen lamp. The longlasting LED provides users a consistent color temperature at any brightness level. With an optional low magnification condenser, users can change the objective magnification from 2X to 100X (dry) without changing the condenser or moving the top lens.

Resource Type: instrument resource

Keywords: BX43 microscope, clinical and research grade microscope, microscope
