Proper Citation: Shanghai Xinruan: Sleep Deprivation Device (RRID:SCR_027998)

Description: Device to systematically deprive mice/rats of sleep for a certain period each day. Uses feedback control by monitoring animal activity levels. It can activate the deprivation lever after the animal enters a specific sleep stage to deprive or break sleep. It has three working modes: feedback adjustment (software control mode), programmable adjustment (external control mode), and independent touch screen adjustment (standard mode). It can be used to create animal models of sleep deprivation or sleep breaking, and features precise adjustment and low physical exertion.
