## **CAST**

RRID:SCR\_000628

Type: Tool

## **Proper Citation**

CAST (RRID:SCR\_000628)

#### **Resource Information**

URL: http://athina.biol.uoa.gr/CAST/

**Proper Citation:** CAST (RRID:SCR\_000628)

**Description:** A novel algorithm for low-complexity region detection and selective masking. The algorithm is based on multiple-pass Smith-Waterman comparison of the query sequence against twenty homopolymers with infinite gap penalties. The output of the algorithm is both the masked query sequence for further analysis, e.g. database searches, as well as the regions of low complexity.

**Abbreviations: CAST** 

Synonyms: CAST - Compositional Bias Detection Algorithm

**Resource Type:** software resource, data analysis software, software application, sequence analysis software, data processing software

**Defining Citation:** PMID:11120681

**Keywords:** low-complexity region detection and selective masking, query sequence against twenty homopolymers, infinite gap penalties, masked query sequence,

Funding: European Molecular Biology Laboratory; Heidelberg; Germany;

European Union; TMR Proramme; IBM Research

**Availability:** Executable binaries are available to academic users free of charge under license.

Resource Name: CAST

Resource ID: SCR\_000628

Alternate IDs: nlx\_151779

**Old URLs:** http://www.ebi.ac.uk/research/cgg/services/cast/

**Record Creation Time:** 20220129T080202+0000

Record Last Update: 20250516T053551+0000

### Ratings and Alerts

No rating or validation information has been found for CAST.

No alerts have been found for CAST.

#### Data and Source Information

Source: SciCrunch Registry

## **Usage and Citation Metrics**

We found 10 mentions in open access literature.

**Listed below are recent publications.** The full list is available at RRID.
