Zebrafish Information Network (ZFIN) (RRID:SCR_002560)

Resource Information

URL: <http://zfin.org>

Proper Citation: Zebrafish Information Network (ZFIN) (RRID:SCR_002560)

Description: Model organism database that serves as central repository and web-based resource for zebrafish genetic, genomic, phenotypic and developmental data. Data represented are derived from three primary sources: curation of zebrafish publications, individual research laboratories and collaborations with bioinformatics organizations. Data formats include text, images and graphical representations. Serves as primary community database resource for laboratory use of zebrafish. Developed and supports integrated zebrafish genetic, genomic, developmental and physiological information and link this information extensively to corresponding data in other model organism and human databases.

Abbreviations: ZFIN

Synonyms: Zebrafish Database, The Zebrafish Model Organism Database, Zebra Model Organism Database, ZebraFish Information Network, ZFIN

Resource Type: data or information resource, database

Defining Citation: [PMID:23074187](#), [PMID:21036866](#), [PMID:16381936](#)

Keywords: expression, gene, anatomy, development, disease, genomic, model, molecular, mutant, neuronal, organism, phenotype, physiological, synteny, zebrafish, gene expression, genome sequence, molecular neuroanatomy resource, genotype, anatomical structure, publication, genome, image collection, gold standard, bio.tools, FASEB list, RRID Community Authority

Funding: NHGRI P41 HG002659;
NHGRI R01 HG004834

Availability: Free, Available for download, Freely available

Resource Name: Zebrafish Information Network (ZFIN)

Resource ID: SCR_002560

Alternate IDs: OMICS_01666, nif-0000-21427, biotools:zfin, r3d100010421, SCR_017504
