Proper Citation: Drexel University Neurobiology and Anatomy (RRID:SCR_003337)

Description: The Department of Neurobiology and Anatomy at the Drexel University College of Medicine provides an outstanding academic environment for pursuing multidisciplinary training and research in neuroscience. The department offers postdoctoral training through a NIH training grants and graduate student training through the Neuroscience program for outstanding individuals preparing for a research career in the biomedical sciences. The Department is also responsible for 3 major courses given to medical students that include Medical Neuroscience, Gross Anatomy and MicroAnatomy. Training can be obtained in all aspects of advanced microscopy and imaging, tissue culture, transplantation techniques, gene therapy and sequencing, behavioral neurobiology, kinematics, intracellular recording, patch clamping, computer modeling of neurobiological processes and robotics. The Department has well equipped shared facilities for confocal microscopy, electron microscopy, image acquisition and processing, small animal surgery, behavioral analysis, biochemistry and molecular biology. Research training is also supplemented by a seminar series featuring faculty, postdoctoral fellows and outside speakers. Journal clubs and discussions of research findings are scheduled regularly and often shared among individual laboratories.
