Description: A comprehensive, free, and interactive platform to help individuals discover more about clinical trials that may be appropriate for them for a variety of diseases. The platform allows stakeholders within the clinical trials community (investigators, site personnel, sponsors, and disease advocates) to engage with potential enrollees and educate them about specific clinical trials. They have identified some of the most commonly used criteria for the clinical trials in each disease. Using these criteria, they developed a questionnaire for a single disease. Then, looking at just those questions, they can start to get a sense of which clinical trials might be appropriate for a particular person which is a helpful to start to narrow down the list of potentially appropriate trials. All clinical trials that are posted on www.clinicaltrials.gov for the diseases that Corengi covers will be on the website.
