Proper Citation: Digital Access to Scholarship at Harvard (RRID:SCR_004122)

Description: Harvard University"s central service for sharing and preserving work. In addition to the scholarly journal articles targeted by Harvard"s several open access resolutions, DASH maybe used to self-archive manuscripts and materials. DASH supports a variety of file formats, and users are encouraged to deposit related materials with manuscripts (including data, images, audio and video files, etc.) When users deposit their work in DASH, it becomes visible to colleagues around the world by virtue of metadata harvesting, Google Scholar, and other indexing services. Higher visibility leads to higher rates of citation and impact. When users post early versions of their work, before publication, they establish intellectual priority sooner. Users act in their own best interests by taking part in the University"s mission to share and preserve the knowledge produced there. Because Harvard now has a prior, non-exclusive license to faculty journal articles in schools with open access policies, those faculty members are required to act accordingly when publishing journal articles, either by attaching an addendum to their publication agreement or obtaining a waiver. They then must deposit the publication in DASH.

Abbreviations: DASH

Resource Type: storage service resource, data or information resource, service resource, database, data repository

Keywords: scholarship, image, audio clip, video resource, manuscript, data
