**Proper Citation:** Marshfield Clinic Biobank (RRID:SCR\_004368)

**Description:** THIS RESOURCE IS NO LONGER IN SERVICE. Documented on January 9, 2023. A large collection of biological samples and health information collected for the Personalized Medicine Research Project (PMRP) for use in biological research. Genetic information from 20,000 participants forms a database enabling scientists to study which genes cause disease, which genes predict reactions to drugs, and how environment and genes work together to cause disease. The goal of this project is to learn how to apply genetic science to human health. This knowledge will help researchers develop new medications and diagnostic tests, and will enable physicians to prescribe medications that work best for a particular person. Marshfield Clinic Personalized Medicine Research Project (PMRP) resources currently available: DNA, plasma, serum, questionnaire, electronic medical records to construct phenotypes; ability to recontact subjects for additional information (where they have given consent for recontact); stored pathology specimens collected for clinical purposes; 51 clinically relevant polymorphisms; Illumina 660 quad for ~4200 subjects aged 50+.

**Abbreviations:** PMRP bio-bank

**Synonyms:** Marshfield Clinic PMRP bio-bank, Personalized Medicine Research Project bio-bank, Marshfield Clinic Personalized Medicine Research Project bio-bank

**Resource Type:** biomaterial supply resource, material resource

**Keywords:** dna, adult human, blood, disease, gene, environment, questionnaire, electronic medical record, clinical, plasma, serum, drug, personalized medicine

**Availability:** THIS RESOURCE IS NO LONGER IN SERVICE

**Resource Name:** Marshfield Clinic Biobank

**Resource ID:** SCR\_004368

**Alternate IDs:** nlx\_38684
