Type: Tool

Proper Citation

University of Zurich SCRM - Cell-and Tissue Biobank (RRID:SCR_004959)

Resource Information

URL: <http://www.scrm.uzh.ch/biobank.html>

Proper Citation: University of Zurich SCRM - Cell-and Tissue Biobank (RRID:SCR_004959)

Description: The SCRM-CTBB offers state-of-the-art infrastructure and technologies (e.g. cryogenic work bench, semiautomatic cryogenic storage system, uninterrupted cooling chain) and is structured into two areas, including research and a GMP/GCP regulated therapeutic applications. Research: For pre-clinical studies, the SCRM-CTBB provides researchers guidance regarding cell and tissue cryo-preservation, comprising registration, handling, storage and distribution. In order to ensure complete traceability on samples and belonging information all processes are controlled by a Laboratory Information Management System (LIMS) and Quality Assurance (QA) system. The SCRM Biobank is designed to create database that allows connection with other biobanks nationally and internationally. This meta-data file will enable a unique scientific resource for interdisciplinary research. For every new study a contract is established describing the study and the disposition rights. Assistance in writing Biobank Agreements (BAs) and Material Transfer Agreements (MTAs) is provided. Therapeutical applications: As a new feature, apart from research, the SCRM Biobank enables the asservation and preservation of cells and tissues under GMP conditions for later therapeutic use. A special focus will be on a conceptional combination of private and public umbilical cord blood banking (hybrid banking), which allows autologous and/or allogeneic cell applications.

Abbreviations: SCRM-CTBB

Synonyms: University of Zurich SCRM - Cell Tissue Biobank, UZH Swiss Center for Regenerative Medicine Cell-and Tissue Biobank, University of Zurich SCRM - Cell and Tissue Biobank, UZH SCRM-CTBB, SCRM Biobank, SCRM - Cell-and Tissue Biobank (CTBB), University of Zurich Swiss Center for Regenerative Medicine Cell-and Tissue Biobank, UZH SCRM - Cell-and Tissue Biobank, SCRM - Cell- Tissue Biobank

Resource Type: biomaterial supply resource, cell repository, material resource

Keywords: cell, tissue, umbilical cord blood, blood, cryopreserved, therapy, research, clinical, frozen, transplantation

Availability: Public: The SCRM Biobank is designed to create database that allows connection with other biobanks nationally and internationally. This meta-data file will enable a unique scientific resource for interdisciplinary research.

Resource Name: University of Zurich SCRM - Cell-and Tissue Biobank

Resource ID: SCR_004959
