Starlab

RRID:SCR_005551

Type: Tool

Proper Citation

Starlab (RRID:SCR_005551)

Resource Information

URL: <http://www.starlab.es/>

Proper Citation: Starlab (RRID:SCR_005551)

Description: Starlab's mission is to transform science into technologies with a profound and positive impact on society. We achieve this by identifying social needs and the market opportunities they create. Then we reach to science and engineering to propose or provide technical solutions, products and services for governments, industry and downstream markets. Starlab Research carries out interdisciplinary R&D focusing on two areas: Space and Applied Neuroscience. Our vision is to make science more useful, alive, vibrant, faster. Our staff consists of a team of scientists, engineers and economists from different nationalities working together to provide our clients with breakthrough technologies that create business opportunities. The growing Starlab team (now more than 28 on staff) includes 5 nationalities spanning knowledge in physics, engineering, oceanography, computer science, neuroscience and economics. Circa 50% of our staff have a PhD, and more than 80% a Master or PhD. We target technology and applications: the development of new sensors and efficient algorithms to extract information from data, identification of platforms and deployment opportunities, as well as the development of services and products. Interdisciplinarity is a key aspect of our research. Space R&D develops payloads, algorithms and mission feasibility studies. We have demonstrated experience in GNSS technologies, radar altimetry and space astronomy. Earth Observation applications include technologies such as GNSS-R, SAR and multi-spectral analysis for environmental and energy applications. We have demonstrated expertise in the development of innovative sensors and systems in both the Space and Applied Neuroscience areas, signal-processing algorithms, with a strong specialization in electrophysiology algorithms, software and hardware. It will also manage the project and prospect potential commercial impact.

Abbreviations: Starlab

Synonyms: Starlab - Living Science, Starlab - Where science turns into the technologies of the future

Resource Type: commercial organization

Keywords: neuroscience, space

Resource Name: Starlab

Resource ID: SCR_005551

Alternate IDs: grid.32517.32, nlx_144642

Alternate URLs: <https://ror.org/040cxgs87>

Record Creation Time: 20220129T080231+0000

Record Last Update: 20260801T190255+0000

Ratings and Alerts

No rating or validation information has been found for Starlab.

No alerts have been found for Starlab.
