Proper Citation: KI Biobank - TBI (RRID:SCR\_005897)

**Description:** THIS RESOURCE IS NO LONGER IN SERVICE, documented August 29, 2016. Project creating a DNA biobank from persons admitted to the neurointensive care unit of the Karolinska University Hospital to study possible genetic influences in traumatic brain injuries (TBI). Serum and cerebrospinal fluid sampled during the subacute phase are also collected. Samples were collected prospectively from clinically well characterized patients to allow for studies of association between candidate genes and clinical outcome parameters or biomarkers for relevant disease processes. The aim is to collect samples from 200-400 individuals. Samples will be collected from TBI patients at up to three different occasions. At first sampling, whole blood, serum and liquor will be collected and at the second and third occasions only serum and liquor.

Abbreviations: KI Biobank - TBI

Synonyms: KI Biobank - Traumatic Brain Injuries

Resource Type: material resource, biomaterial supply resource

**Keywords:** injury, brain injury, genetic influence, candidate gene, clinical outcome,

biomarker

**Related Condition:** Traumatic brain injury

**Funding:**
