## MIRIAM Resources

RRID:SCR\_006697

Type: Tool

### Proper Citation

MIRIAM Resources (RRID:SCR\_006697)

### Resource Information

**URL:** <http://www.ebi.ac.uk/miriam/>

**Proper Citation:** MIRIAM Resources (RRID:SCR\_006697)

**Description:** A set of online services created in support of MIRIAM, a set of guidelines for the annotation and curation of computational models. The core of MIRIAM Resources is a catalogue of data types (namespaces corresponding to controlled vocabularies or databases), their URIs and the corresponding physical URLs or resources. Access to this data is made available via exports (XML) and Web Services (SOAP). MIRIAM Resources are developed and maintained under the BioModels.net initiative, and are free for use by all. MIRIAM Resources are composed of four components: a database, some Web Services, a Java library and this web application. \* Database: The core of the system is a MySQL database. It allows us to store the data types (which can be controlled vocabularies or databases), their URIs and the corresponding physical URLs, and other details such as documentation and resource identifier patterns. Each entry contains a diverse set of details about the data type: official name and synonyms, root URI, pattern of identifiers, documentation, etc. Moreover, each data type can be associated with several resources (or physical locations). \* Web Services: Programmatic access to the data is available via Web Services (based on Apache Axis and SOAP messages). In addition, REST-based services are currently being developed. This API allows one to not only resolve model annotations, but also to generate appropriate URIs, based upon the provision of a resource name and accession number. A list of available web services, and a WSDL are provided. A browser-based online demonstration of the Web Services is also available to try. \* Java Library: A Java library is provided to access the Web Services. The documentation explains where to download it, its dependencies, and how to use it. \* Web Application: A Web application, using an Apache Tomcat server, offers access to the whole data set via a Web browser. It is possible to browse by data type names as well as browse by tags. A search engine is also provided.

**Synonyms:** MIRIAM Registry

**Resource Type:** data or information resource, catalog, narrative resource, data access protocol, database, standard specification, software resource, web service

**Defining Citation:** [PMID:22140103](#), [PMID:18078503](#)

**Keywords:** life science, bio.tools

**Availability:** Free

**Resource Name:** MIRIAM Resources

**Resource ID:** SCR\_006697

**Alternate IDs:** nlx\_69582, biotools:miriam

**Alternate URLs:** <https://bio.tools/miriam>

**Record Creation Time:** 20220129T080237+0000

**Record Last Update:** 20260801T190318+0000
