Proper Citation: Thompson Center for Autism and Neurodevelopmental Disorders (RRID:SCR_006812)

Description: The mission of the Thompson Center is to improve the lives of individuals and families affected by autism and neurodevelopmental disorders through world class programs that integrate research, clinical service delivery, education and public policy. The Thompson Center's vision is to become a recognized national center of excellence that serves as a model of interdisciplinary practice, research and training in the field of autism and neurodevelopmental disorders. At the MU Thompson Center, education and training activities are a key part of our mission. Our goal is to teach others about the needs of persons with autism and other neurodevelopmental disorders and their families. In addition, we strive to help learners acquire skills needed to improve the outcomes of individuals with developmental differences. These skills include evidence-based assessment and intervention strategies, interdisciplinary approaches to service delivery, research methods, and policy development. The Thompson Center offers a range of health, educational and behavioral services in one location for individuals with autism and other developmental concerns. Professionals from different disciplines strive to deliver family-centered care that is comprehensive and coordinated. Autism recently has been recognized as a national public health concern, and federal research funding in this area has increased substantially. Faculty members engage in research that will lead to early identification, treatment and ultimately prevention of autism spectrum disorders (ASD). How findings may eventually translate into improved outcomes in clinical and community settings is a primary goal of our research.

Abbreviations: Thompson Center

Synonyms: MU Thompson Center, Thompson Center for Autism Neurodevelopmental Disorders, MU Thompson Center for Autism and Neurodevelopmental Disorders

Resource Type: portal, topical portal, training resource, disease-related portal, data or information resource

Keywords: research, training, service, resource
