Clair library

RRID:SCR_007019

Type: Tool

Proper Citation

Clair library (RRID:SCR_007019)

Resource Information

URL: <http://www.clairlib.org>

Proper Citation: Clair library (RRID:SCR_007019)

Description: A suite of open-source Perl modules intended to simplify a number of generic tasks in natural language processing (NLP), information retrieval (IR), and network analysis (NA). Its architecture also allows for external software to be plugged in with very little effort. The latest version of clairlib is 1.06 which was released on March 2009 and includes about 130 modules implementing a wide range of functionalities. Clairlib is distributed in two forms: * Clairlib-core, which has essential functionality and minimal dependence on external software, and * Clairlib-ext, which has extended functionality that may be of interest to a smaller audience. Much can be done using Clairlib on its own. Some of the things that Clairlib can do are: Tokenization, Summarization, Document Clustering, Document Indexing, Web Graph Analysis, Network Generation, Power Law Distribution Analysis, Network Analysis, RandomWalks on Graphs, Tf-IDF, Perceptron Learning and Classification, and Phrase Based Retrieval and Fuzzy OR Queries.

Abbreviations: Clairlib

Synonyms: Computational Linguistics And Information Retrieval Library

Resource Type: software resource, data analysis software, text extraction software, software toolkit, software application, text-mining software, data processing software

Keywords: analysis, information, linguistic, module, network, process, retrieval, perl, natural language processing, information retrieval, network analysis

Funding: NSF IIS 0534323;
