Proper Citation: Frontiers Community: A Network that Serves researchers (RRID:SCR_007214)

Description: Frontiers community is a web portal for both open access Frontiers journals and a community portal for jobs, books, and scholarly events. Frontiers is more than just an open-access publisher of scholarly articles: it is a pioneering approach to the world of academia, radically improving the way scholarly research is managed. The grand vision of Frontiers is a world where all people have an equal opportunity of seeking, sharing and generating knowledge. As a first active measure in this direction, Frontiers provides immediate and permanent online open access to all of its publications, but this alone is not enough to realize our grand goals. The Frontiers solution develops around two main concepts, mutually integrating each other within the innovative Frontiers' platform: * the Frontiers Journal Series, and * the Frontiers Community. As an open-access Journal Series, Frontiers revolutionizes research publishing by freely delivering the most outstanding research, evaluated with no bias from both the academic and social point of view. As an interdisciplinary Community system, Frontiers is reshaping research management with a state-of-the-art platform, designed as a collaborative architecture and aimed at all research communities, whether academicians or research enthusiasts, investors or grantmakers. By applying the most advanced information technologies, Frontiers is catapulting scholarly publishing into a new 21st century generation.

Synonyms: Frontiers Community

Resource Type: organization portal, data or information resource, community building portal, portal

Resource Name: Frontiers Community: A Network that Serves researchers

Resource ID: SCR_007214

Alternate IDs: nif-0000-07735

Record Creation Time: 20220129T080240+0000

Record Last Update: 20260815T182332+0000

Ratings and Alerts

No rating or validation information has been found for Frontiers Community: A Network that Serves researchers.

No alerts have been found for Frontiers Community: A Network that Serves researchers.
