Proper Citation: Dartmouth Medical School Neuroscience (RRID:SCR_007449)

Description: The establishment of the Neuroscience Center at Dartmouth (NCD) in 2002 has produced a new and unique interdisciplinary group whose mission is to foster collaborative and interactive research and education in the neurosciences. Training opportunities in neuroscience include undergraduate minor/major in Neuroscience, graduate training toward a Ph.D., and postdoctoral training. The NCD draws from the strengths in three key areas: Clinical, Cognitive & Behavioral, and Molecular/Cellular/Systems Neuroscience. It is the vision of its researchers to produce and disseminate new knowledge, and in doing so train and educate the next generation of neuroscientists. Interactions among members of the neuroscience community are enhanced and foster a highly interactive atmosphere through the development of this integrated Center. By promoting multidisciplinary efforts in both basic and applied research, the Center's scientists will contribute to human health and well being by increasing our understanding of the mechanisms underlying nervous system function, both in health and disease. This will lead to valuable discoveries that translate into novel pharmaceutical agents and therapeutic approaches for the treatment of a variety of central nervous system diseases and disorders. The research facilities are located in Hanover, NH, Lebanon, NH (Dartmouth-Hitchcock Medical Center) and the Veteran Affairs Medical Center in White River Junction, Vt. Research interests comprise a broad range of studies within the neurosciences and provide a wide range of research opportunities for students. In addition, the NCD augments the education of residents and fellow at the clinical level who have academic neuroscience interests.

Abbreviations: NCD

Synonyms: Neuroscience Center at Dartmouth, DMS Neuroscience

Resource Type: postdoctoral program resource, data or information resource, degree granting program, undergraduate program resource, graduate program resource, training
