Interferome

RRID:SCR_007743

Type: Tool

Proper Citation

Interferome (RRID:SCR_007743)

Resource Information

URL: <http://www.interferome.org>

Proper Citation: Interferome (RRID:SCR_007743)

Description: Interferome is a database that provides identification of interferon regulated gene signatures from high-throughput data sets (i.e. microarray, proteomic data etc.). It will also assist in identifying regulatory elements and enable comparison of tissue expression of IRGs in human and mouse. Availability of sequence information from more than 37 species, together with comprehensive annotation will enable comparative genomics and phylogenetic analysis to be performed on these IRGs. Within the database, Type I, II and III IFN regulated genes have been manually curated from more than 28 publicly available microarray datasets. Interferon Regulated Genes (IRGs) were identified from multiple microarray and proteomic experiments where cells were treated with IFNs. Genes that were up or down regulated more than 1.5 fold relative to control samples were defined as IRGs.

Synonyms: Interferome

Resource Type: database, data or information resource

Keywords: FASEB list

Resource Name: Interferome

Resource ID: SCR_007743

Alternate IDs: nif-0000-03032

Record Creation Time: 20220129T080243+0000

Record Last Update: 20260805T044156+0000

Ratings and Alerts

No rating or validation information has been found for Interferome.

No alerts have been found for Interferome.
