Proper Citation: University of Arkansas for Medical Sciences Department of Neurobiology and Developmental Sciences (RRID:SCR_007981)

Description: The Department of Neurobiology and Developmental Sciences is structured around three divisions originally intended as academic entities designed to facilitate and support the growth and development of faculty with common interests. Ideally, this will continue to foster the development of programmatic, interdisciplinary funding which would benefit both young and established faculty. The Divisions also provide leadership opportunities for Senior faculty, as they help the Chair with faculty development. In essence, the divisions are sites for mentoring of faculty who need training and skills in specific areas. Many faculty participate in multiple divisions, depending on their needs, interests, and expertise. The three divisions include the Division of Anatomical Education, the Division of Translational Neuroscience, and the Division of Cellular and Molecular Neuroscience.
