Proper Citation: Database of oligomerization domains from lambda experiments (RRID:SCR_008107)

Description: THIS RESOURCE IS NO LONGER IN SERVICE, documented on July 15, 2013. Doodle is a database that was developed to store and distribute information about the protein oligomerization domains that are encoded by various genomes. The protein oligomerization domains described here were found using the lambda repressor fusion system. Doodle uses a schema that is based on Ensembl, while also utilizing bioperl modules to both store and retrieve data. The frontend was developed entirely in perl, while the backend utilizes MySQL. GMOD was used to develop the genomic view.

Synonyms: Doodle

Resource Type: data or information resource, database

Keywords: genome, oligomerization, protein
