ORCID - Open Researcher and Contributor ID

RRID:SCR_008700

Type: Tool

Proper Citation

ORCID - Open Researcher and Contributor ID (RRID:SCR_008700)

Resource Information

URL: <http://www.orcid.org/>

Proper Citation: ORCID - Open Researcher and Contributor ID (RRID:SCR_008700)

Description: Non-profit organization dedicated to solving the author/contributor name ambiguity problem in scholarly communications by creating a central registry of unique identifiers for individual researchers and an open and transparent linking mechanism between ORCID and other current author ID schemes. These identifiers, and the relationships among them, can be linked to the researcher's output to enhance the scientific discovery process and to improve the efficiency of research funding and collaboration within the research community. The ideal solution is to establish a registry that is adopted and embraced as the de facto standard by the whole of the community. A resolution to the systemic name ambiguity problem, by means of assigning unique identifiers linkable to an individual's research output, will enhance the scientific discovery process and improve the efficiency of funding and collaboration. The organization brings together the leaders of the most influential universities, funding organizations, societies, publishers and corporations from around the globe and is managed by a fourteen member Board of Directors. A disambiguated set of authors will allow new services and benefits to be built for the research community by all stakeholders in scholarly communication: from commercial actors to non-profit organizations, from governments to universities.

Abbreviations: ORCID

Synonyms: ORCID: Open Researcher and Contributor ID, Open Researcher & Contributor ID (ORCID), ORCID - Open Researcher Contributor ID, Open Researcher and Contributor ID, ORCID - Open Researcher and Contributor ID, ORCID - Open Researcher & Contributor ID

Resource Type: data or information resource, international standard specification, narrative resource, service resource, standard specification

Keywords: name ambiguity, scholarly communication, unique identifier, author identification, identifier service, people resource

Funding: American Physical Society ;
