Proper Citation: Joslin Diabetes Center Islet Isolation Core (RRID:SCR_012299)

Description: Core facility that provides the following services: Rodent and Porcine Islet Isolation Services, Training Services. The main objective of the Islet Isolation Core is to provide Islets of Langerhans to investigators in the Boston area and beyond. By receiving islets from the Core one is assured of consistent high quality and purity of islets for experiments. The Core can isolate rodent and neonatal porcine islets. This leaves the investigator to concentrate on experiments rather than the complexity of islet isolation. The Core can buy the animals or the investigator can provide their own, such as special transgenic mice. Over the last five years the Core has isolated more than 10 million islets. They also provide training and advice. The Core can provide training not only for the isolation procedure but islet viability, islet size measurement, GSIS (Glucose Stimulated Insulin Secretion), STZ-induced diabetes, transplantation under the kidney capsule, and islet graft retrieval.

Abbreviations: JDC Islet Isolation Core

Synonyms: Harvard University Islet Isolation Core, Harvard JDC Islet Isolation Core, Harvard University Islet Isolation Core (JDC), Harvard University Joslin Diabetes Center Islet Isolation Core

Resource Type: training service resource, core facility, service resource, access service resource

Keywords: cell viability assay, cell separation
