Proper Citation: National Institute on Disability and Rehabilitation Research (RRID:SCR_012858)

Description: Created in 1978, The National Institute on Disability and Rehabilitation Research (NIDRR) is a national leader in sponsoring research. We provide leadership and support for a comprehensive program of research related to the rehabilitation of individuals with disabilities. All of our programmatic efforts are aimed at improving the lives of individuals with disabilities from birth through adulthood. NIDRR is located in Washington, D.C., and is one of three components of the Office of Special Education and Rehabilitative Services (OSERS) at the U.S. Department of Education. NIDRR operates in concert with the Rehabilitation Services Administration (RSA) and the Office of Special Education Programs (OSEP). The mission of NIDRR is to generate new knowledge and promote its effective use to improve the abilities of people with disabilities to perform activities of their choice in the community, and also to expand society's capacity to provide full opportunities and accommodations for its citizens with disabilities. Toward this end, NIDRR conducts comprehensive and coordinated programs of research and related activities to maximize the full inclusion, social integration, employment and independent living of individuals of all ages with disabilities. NIDRR's focus includes research in areas such as employment; health and function; technology for access and function; independent living and community integration; and other associated disability research areas. Balanced between the scientific and consumer communities, NIDRR plays a unique role in federally-funded research activities. As part of the scientific community, NIDRR makes an important contribution to the overall knowledge in rehabilitation medicine, engineering, psychosocial rehabilitation, integration, vocational outcomes and the virtual and built environments. In addition, NIDRR's work helps to integrate disability research into our nation's policies regarding science and technology, health care, and economics.
