## GenTaR

RRID:SCR\_019131

Type: Tool

### Proper Citation

GenTaR (RRID:SCR\_019131)

### Resource Information

**URL:** <https://www.gentar.org/>

**Proper Citation:** GenTaR (RRID:SCR\_019131)

**Description:** System that consists of Application Programming Interface which controls access to information stored in database, and web interface that provides way of interacting with data stored in GenTaR database. Users can track production and phenotyping of different types of mutant allele. Allows consortia to follow progress made in characterising set of genes that they are interested in. To create new project or plan, or to view consortium gene list in GenTaR credentials to log into GenTaR are required. Project search box enables to look for projects working on specific gene by entering gene symbol or gene MGI accession identifier. Search results without logging in will only include public data. Otherwise application search results also include data for Protected and Restricted projects.

**Resource Type:** portal, web service, service resource, data access protocol, data or information resource, software resource

**Keywords:** Track mutant allele production, track mutant allele phenotyping, mutant allele data, characterising set of genes, find gene data, gene MGI accession identifier, gene symbol

**Availability:** Restricted

**Resource Name:** GenTaR

**Resource ID:** SCR\_019131

**Alternate URLs:**
