Description: Incubator features humidity and temperature control technology, which provides both stability control for cultures. The direct heat and air jacket system eliminate the inconvenient use of water in the incubator and provides heat from the door, side, and bottom of the unit. The Sanyo MCO-19AIC utilizes a dual detector infrared CO2 sensor, which is not affected by changes in humidity or temperature, maintains constant conditions via the microprocessor control, and automatically calibrates using room air temperature as reference. Also features Safe Cell UV contamination control system.
